

GOOD PRACTICES TO REDUCE WASTE

ATTENTION TO PACKAGING!

Buy loose products or choose packaging made with recyclable material, avoiding packaging that increases residual waste.

NEW LIFE TO OBJECTS!

Before throwing away objects that no longer work or that you no longer need (clothing, toys, furniture) try to repair them or choose to resell or give them away.

NO TO DISPOSABLES

Buying durable and quality goods is good for our wallet and for the environment.

PREFER SEASONAL FOOD PRODUCED IN YOUR AREA

They are more genuine, cheaper and with low environmental impact. In this way you will support the local economy.
